AI Decisioning For Maximum Recovery Opportunities

Problem

The P/C insurance industry has experienced a reduction in the ability to recognize subrogation opportunities due to talent shortages and associated turnover. These overlooked recovery opportunities have claims executives feeling the pressure as loss ratios increase in tandem with extra-contractual exposures for the carrier.

Solution

SubroScore by Gigaforce eliminates the guesswork and maximizes recovery opportunities while improving cycle times by as much as 33%. Built on decades of claims experience, our AI decisioning models are seamlessly integrated with your rules and workflows so you can breathe easy knowing you're lowering loss ratios while providing an elevated policyholder experience

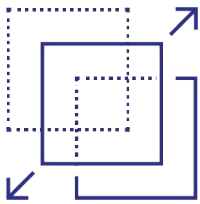

Solution Benefits

- 50% efficiencies improvements
- 20% more recovery opportunities
- Elevating the Policyholder Experience

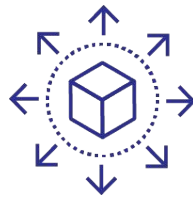

SubroScore by Gigaforce

SubroScore is a standalone module of the Gigaforce Subrogation Platform - the industry's first and only open ecosystem that's utilizing intelligent automation to drastically reduce claims severity and combined ratios for modern insurers.

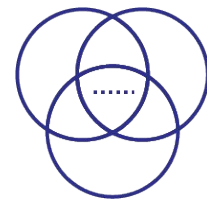

SubroScore paves the way for maximizing recovery opportunities and straight-through processing.

Seamless integration
Pre-built APIs connect most claims systems and an OpenAPI architecture enables quick deployment and time-to-value for any carrier system.

AI Decisioning uses vast datasets, historical scoring models, and trend data to deliver precise recommendations (and our AI explains why a decision was made.)

Unparalleled Efficiencies.
From identifying, evaluating and notification including value determination explainers, our intelligent automation drives efficiencies.

About Gigaforce, Inc.

Gigaforce is a Sunnyvale, CA insurance technology company built by and for P/C claims executives to maximize recovery opportunities and drive unparalleled efficiencies through the industry's first open ecosystem utilizing intelligent automation.
